

Biotime 8 – How to Migrate

Following are steps to take when you link Biotime to the App.

System > Database > Migrate

First backup your ZKTime.net or Biotime 7 database.

The screenshot shows the ZKT Eco System interface. The top navigation bar includes: Personnel, Device, Attendance, Access Control, Payroll, Visitor, Meeting, MTD, and System (highlighted). The left sidebar menu includes: User, Database, Backup, Migrate (highlighted), Integration, Middleware Table, Log, and Configuration. The main content area is titled 'Database Migration' and contains the following fields and options:

- Migrate From: ZKTime Web 2.0, BioTime 7.0, WDMS 5, ZKTime.Net 3.0
- Database Type: (dropdown)
- Database Name:
- Address:
- Port:
- User:
- Password:
- Migration Data: Area/Zone, Department, Position, Employee, Device, Transaction

At the bottom of the form are three buttons: Test Connection, Migrate, and Reset.

Please fill in all fields:

Migrate from: Select the software from which you want to migrate.

Database: Select the database type used by the original software

Address: Enter the IP address of the database

Port: Enter the port number to connect to the database

Name: enter the database name

Username: enter the username

Password: enter the password

Migration data: Select the fields that you want to convert

Please test the connection first

When the connection is perfect please click on Migrate
