

ZKBioSecurity – How to add Time zones

Time zones are for who can have access to a specific door during what time:

Following are steps to take when you add Time zones.

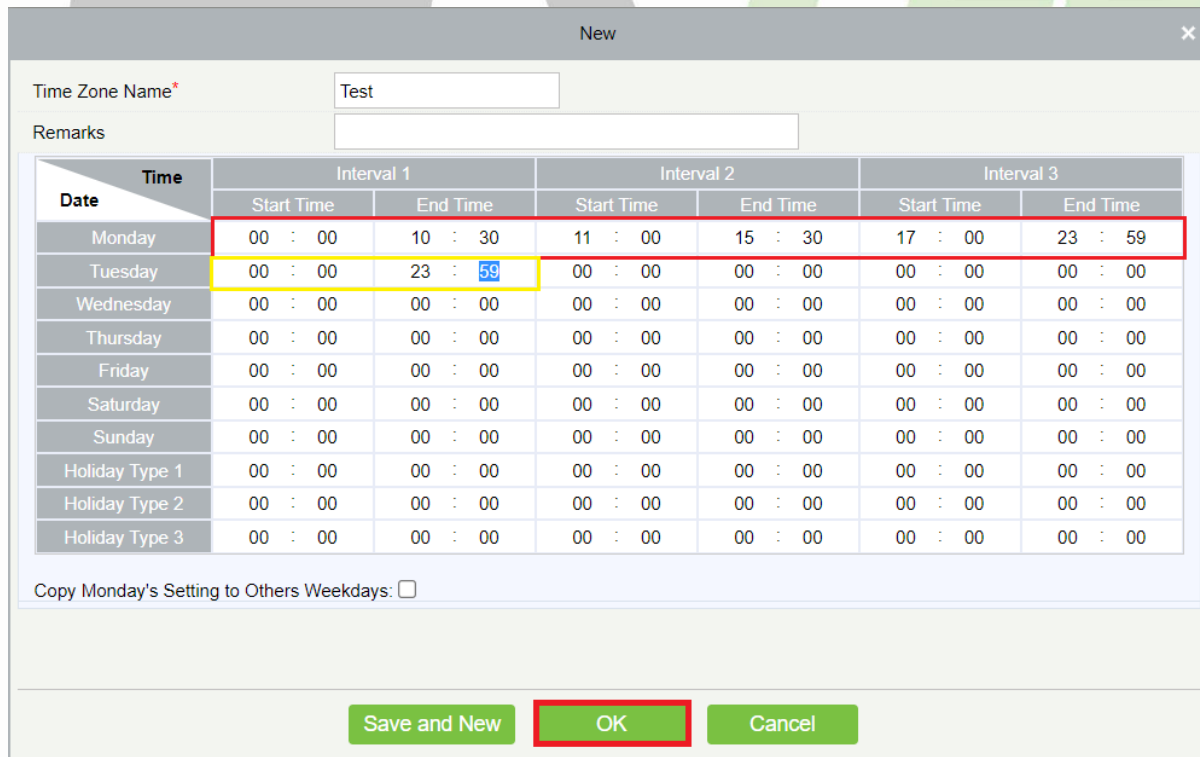

Devices > Access Control > Time Zones

Click on New

Time zones have 3 intervals per day or a 24Hrs Time Zone.

24Hrs Time zone is by default added.

Click OK. Your Time Zones are set up. Your Devices and Personnel can be linked to time zones.

On the above image, Monday has 3 different Time Zones and Tuesday has 24hrs Time Zones

***Monday:**

1st Interval

00h00 till 10h30 people have access but from 10h31 till 10h59 they will not have access. The device will say illegal time period if they try to access the door.

2nd Interval

From 11h00 till 15h30, people will have access. From 15h31 till 16h59 illegal time period

From 17h00 till 00h00 people will have access to the door

***Tuesday:**

It has 24hrs access
