

ZKBioSecurity – Access levels by Department

Add the selected department to the selected access levels or delete the selected department from the access levels. The access of the staff in the department will be changed.

Following are steps to take when setup access levels by Department

Device > Access Control > Access levels by Department

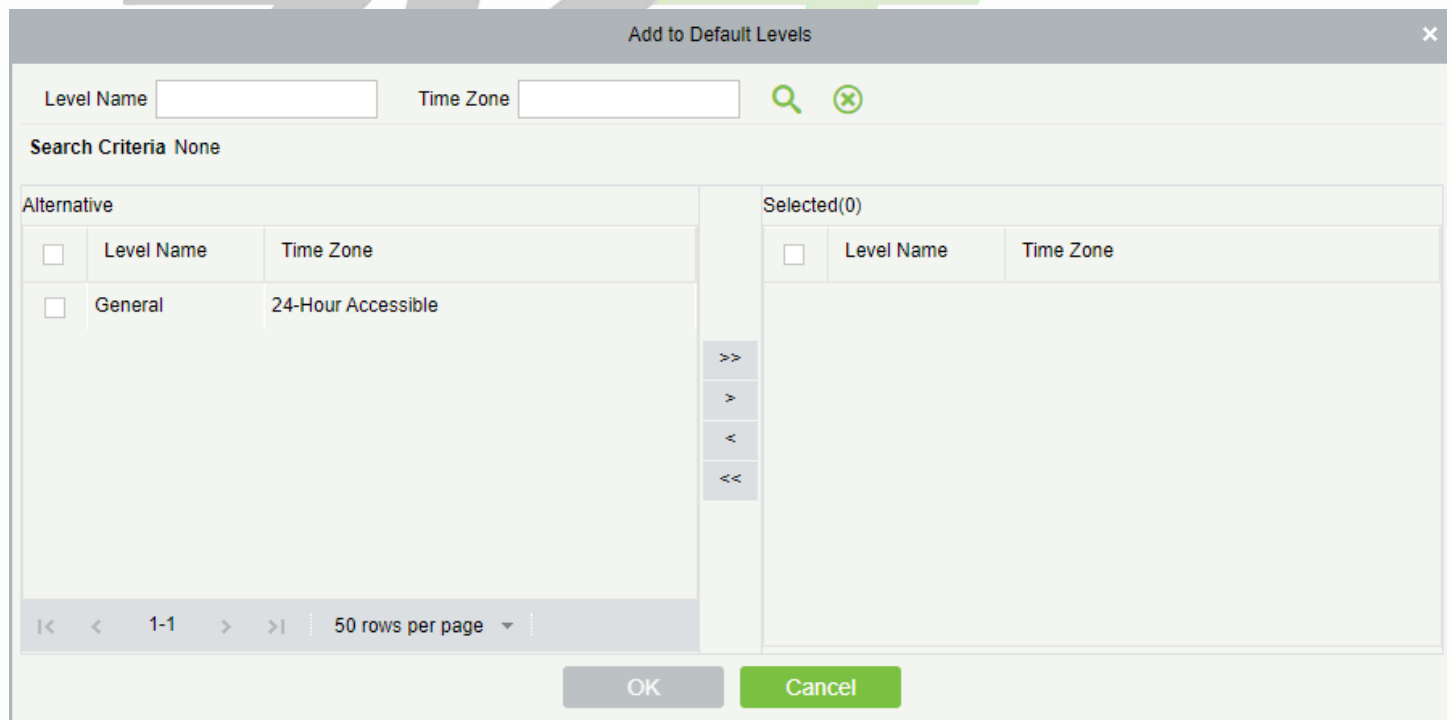

Click on Add to default levels

To set up Departments, please refer back to the how-to setup Department document.

Here you need to link the devices that are used by the department.

Click on the device by tick the tick box. Move it over to the right with the > button.

Click on OK
